

Fishing Guide

You can fish in many ways and in many different locations here in Ulricehamn. There are plenty of fish and fishing lakes to choose from. We have all of 15 fisheries preservation areas, and in many of these locations, you can hire a rowing boat.

In Ulricehamn Municipality, we want to take care of our good fish stocks, so we do not want people to take more fish than for household needs. In many species, it is the females who grow to be the biggest, and by releasing e.g. large pike back into the lake, we ensure better and more sustainable fishing for the future. Therefore, we see it as a matter of course to release the really big fishes so that we get a sustainable fish stock.

12. Sämsjön – Södra Sämsjöns FVOF

The lake Sämsjön offers some exciting fishing. The lake has shallow inlets that are excellent for spring fishing for pike. Fishing in lake Sämsjön is easiest from a boat, as it is almost entirely lined with reeds. Places to put in/go ashore can be found on the bathing areas in Vegby and Slumsvik.

Lake Sämsjön is known for its big pike. Perhaps the biggest reason why the pike grow so big, is that the lake has good stocks of Lavaret. The stock of pike perch is also growing.

A detailed nautical chart can be bought at the local bookstore and at Ulricehamn's Tourist Information.

Directions: Road 157 to Gällstad, turn right towards Vegby. From the church in Månstad, follow the signs to Gällstad and Slumsvik.
