

Want to help clean up the beach?

Which equipment do you need?

A bag and gloves are good to have, bring them from home if you can. Bags are also available in bag dispensers along the coast. In the Beach Cleaning Map app, you can see where the bag dispensers are located.

How do you know which beach needs cleaning?

Litter is most often washed ashore in bays that are open to the west. Another tip is to look for marked clean-up needs in the Beach Cleaning Map app.

Where do I leave full bags?

Take the bags with you if you can, or place them in a nearby waste bin. If you are unable to take care of the bags yourself, mark "Hämtbehov" in the Beach Cleaning Map app. The litter will then be collected by professional beach cleaners as soon as possible.

Make sure to place bags in an easily accessible spot and ensure that the litter cannot be spread by the wind.
